

SHRIKE AVENGER

The first game for the Sente simulator system, SHRIKE AVENGER™ is a combination of video game and ride. The player maneuvers his spaceship through a running battle with a pirate force. Every movement of the game controls is experienced through the movement of the simulator. The cabinet graphics and video monitor are designed to blend together to make the player feel he is inside the cockpit of a space fighter. To the player, Shrike Avenger looks and feels like the real thing.
